

LOUDSPEAKER VOLUME CONTROL

➤ **VCT80**

ARCHITECTS & ENGINEERS SPECIFICATION

This unit shall be the PENTON VCT80 or equal and approved.

The Volume Control is to be housed in a double gang ABS moulding with a removable 2 piece front bezel for concealed fixing and separate back box.

Units to have an integral 80w/100v line transformer with 10 separate windings, decreasing in 3dB steps to an OFF position. The rotary selector will be stepped with no end stop. It will have a smooth transition in output level with no induced noise.

Volume control must have a wide frequency response of 40Hz - 20 kHz.

All connections too and from the volume control are to be made via a removable terminal strip for ease of installation.
